WORK EXPERIENCE

Power Engineer
Minsk Electric Networks

08/2022 - Present   *Belarus, Minsk*

Achievements

- Reorganized the documentation tracking process by designing and developing a client web application using REST API. My application reduces time required to browse incoming and outgoing documents by 100%. It is implemented in 4 regional electrical network companies.
- Simplified the process of maintaining actual information about power balances by developing Selenium JavaScript bot to submit forms instead of manually filling them in. This application is also widely used in regional electrical network companies.
- Improved work conditions by developing a full stack phone book web application for my current work department.

Front-End Developer
Rolling Scopes Schoold

12/2022 - Present   *Remote*

Tasks

- Build pixel perfect two page websites as pet projects to train constructing responsive layouts.
- Develop personal small pet projects such Minesweeper game, CSS training game and Virtual keyboard.
- Design and implement virtual race application to practice REST client-server interaction.

EDUCATION

Power Engineer
Belarusian National Technical Univercity

09/2017 - 06/2022   *Belarus, Minsk*

Front-End Developer
Rolling Scopes School

12/2022 - Present   *Remote*
