WORK EXPERIENCE

Power Engineer
Minsk Electric Networks

08/2022 - Present   *Belarus, Minsk*

Achievements

- Reorganized the documentation tracking process by designing and developing a web application It reduces time required to browse incoming and outgoing documents by 100%. It is implemented in 4 regional electrical network companies.
- Simplified the process of maintaining actual information about power balances by developing Selenium JavaScript bot to submit forms instead of manually filling them in. It is also widely used in regional electrical network companies.
- Improved work conditions by developing a full stack phone book web application for my current work department.
